

SEG 2011 Spring Distinguished Lecture

Dr Andrey Bakulin SEG DL 2011 Speaker being facilitated by Mr U.S.D.Pandey

SPG, Vadodara Chapter hosted the SEG 2011 Spring DL on 14th February, 2011. The lecture was delivered by Dr Andrey Bakulin from Saudi Aramco on a very interesting topic “Virtual Source Method for Imaging and Monitoring Below Complex Overburden”. The subject enthused the participants who showed keen interest in the subject.

During the interactive question session participants asked about the application of the method in cases like when the complex overburden is very deep or the practicability in terms of money to be spent for drilling wells to place the geophones down below and the manufacturing cost of such typical geophones.
